Professional Summary

MCA graduate focused on Python backend development, cloud technologies, and machine learning. Skilled in Django, REST APIs, React.js, Node.js, SQL, and scalable web application development.

Education

Master of Computer Applications (MCA) – Brindavan College, Bangalore CGPA: 8.71

Bachelor of Science (B.Sc. PMCs) – Jyoti Nivas College, Bangalore 66%

Technical Skills

- **Languages:** Python, JavaScript, SQL
- **Backend:** Django, DRF, Node.js, Express.js, REST APIs
- **Frontend:** React.js, HTML, CSS, JavaScript
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps:** AWS, Docker, Git, GitHub, Linux, CI/CD
- **AI / ML:** NumPy, Pandas, Scikit-learn
- **Tools:** VS Code, Postman

Internships

ITkraftz (Software Product Owner Intern) Jul 2025 – May 2026

- Developed a Crypto Wallet Tracker for monitoring cryptocurrency transactions and wallet balances.
- Built REST APIs using Node.js and Express.js for blockchain data processing and integration.
- Designed responsive React.js dashboards and integrated Blockchain APIs for live transaction tracking.

BSNL (Industrial Training) 1 Week

- Learned telecom infrastructure, switching systems, and networking operations.
- Observed broadband communication systems and telecom equipment maintenance processes.
- Gained practical exposure to network management and telecommunication technologies.

Edunet Foundation (Training Program) Dec 2024 – Mar 2025

- Completed project-based training on software development and emerging technologies.
- Strengthened programming, debugging, and problem-solving skills through hands-on activities.
- Collaborated on technical tasks and gained experience in real-world development practices.

Projects

AI Real Estate Price Prediction (MERN Stack)

- Developed an AI-based real estate platform for predicting property prices using MERN stack.
- Built responsive React UI and REST APIs using Node.js and Express.js.
- Managed datasets and property listings using MongoDB.
- GitHub: [ai-real-estate](#)

Crypto Wallet Tracker

- Built a cryptocurrency tracker using React.js and Node.js.
- Integrated Blockchain APIs for wallet balances and transaction history.
- Designed dashboards for Bitcoin and Ethereum wallet monitoring.
- GitHub: [Crypto-wallet-tracker](#)

AI Phishing Detection System

- Developed a phishing detection application using Python, Django, and ML.
- Performed feature extraction and trained ML models using Scikit-learn.
- Built REST APIs for phishing URL prediction.
- GitHub: [AI-Phishing-Detection](#)

AI Study Planner

- Developed an AI-powered Study Planner using React, Django, and SQL.
- Implemented secure backend APIs and responsive frontend components.
- Managed study plans, analytics, and user data using SQL databases.
- GitHub: [Ai-Study-Planner](#)

Leadership & Activities

Joint Secretary of Mathematics Club; organized technical and coding events.

Class Representative coordinating communication between students and faculty.

Certificates

Full Stack Web Development – MERN Stack

Python Programming – Core Python

Machine Learning – Scikit-learn

Data Analysis – Excel, Power BI, Tableau
